

MAXUSS

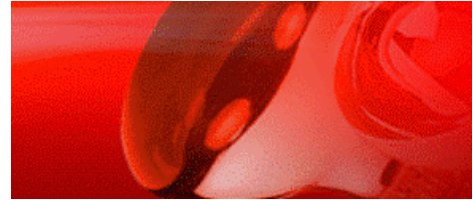

High Output LIGHTWEIGHT SOLARIUM

The solarium is shaped specially to follow the horses back lines and provide the perfect treatment/heat to specific muscle groups. By using a heat resistant plastic, aluminium lamp holders and reuse the rest heat, we achieve a very high output. The front and rear sections of the unit can be moved up and down separately so you can always find the right position for your horse. The solarium is shaped with only round edges so that your horse will not easily injure itself. The lamps are placed higher than the reflecting surface of the solarium so the chance of your horse touching the warm lamps is reduced to a minimum.

- Stylish Shape
- Lightweight Design
- Flexible Shape Adjustment
- High Heat Output
- Heat Resistant plastic
- Spray water proof
- CE Marking
